Our Mission

First Nations Development Institute invests in and creates innovative institutions and models that strengthen asset control and support economic development for American Indian people and their communities.
Our strategies are designed to support the entire ecosystem of transformative change in Native communities and build a network of grantee partners that ultimately leads to asset-building in Native communities.
**Our Approach**

First Nations has always been exclusively committed to Native control of tribal assets and to restore control and promote culturally-compatible stewardship of those assets.

---

**Asset-Building Defined**

A positive and collaborative approach, asset-building focuses on cultivating traditional knowledge and practices, and creating new ones to build Native capacities, capabilities and communities.

---

**Why Asset-Building Works**

Native nations are uniquely knowledgeable about their own communities. They know the strengths, challenges and needs of their communities better than outside agencies. It strengthens the effectiveness of Native nations to create solutions to their own challenges and allows them to best leverage their resources on their own terms. In brief, in the long term it works because it helps protect and enhance tribal sovereignty.
